## DETAILED ACTION

### Reasons For Allowance

1. The claims 1, 5-7, 12-27, 29-34, 36-37, 40-42, 47, and 49-58, are allowable over the prior art of record for at least the reason that the prior art fails to teach or suggest a structure as in claims 1 and 36; **Regarding Claim 1**; a intermediate layer consists of an organic matrix with embedded nanofibers is between a heat source and a heat sink which bear against the intermediate layer with a surface pressure between .1 and 100 bar; the nanofibers have a length between 1-100 $\mu$ m and a thickness of the intermediate layer is between .01-05mm, and wherein a length/thickness ratio of a majority of the nanofibers is greater than 10; the organic matrix is in a viscous state at an operating temperature of an apparatus between 40°C and 80°C and the percentage of nanofibers is between 5 and 20% by weight in relation to the total mass of the intermediate layer.

**Regarding Claim 36**; a intermediate layer consists of an organic matrix with embedded nanofibers is between a heat source and a heat sink; the nanofibers have a length between 1-100 $\mu$ m, a thickness between 1.3nm-300nm, and a thickness of the intermediate layer is between .01-05mm; and wherein a length/thickness ratio of a majority of the nanofibers is greater than 10; the organic matrix is in a viscous state at an operating temperature between 40°C and 80°C and the percentage of nanofibers is between 5 and 20% by weight in relation to the total mass of the intermediate layer. The aforementioned limitations in combination with all remaining limitations of the respective claims are believed to render the independent claims 1, 36, and all claims dependent therefrom patentable over art of record.

2. Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
